LES ROWNESS

ABOUT

Les Rowness is a Dutch DJ and producer shaping his sound within Afro House and Afro Tech. Driven by deep rhythms, hypnotic percussion and melodic elements, his music moves naturally between deeper, atmospheric moments and more powerful club energy.

His approach to DJing is built around flow and progression. Rather than simply moving from track to track, Les Rowness allows his sets to develop through rhythm, atmosphere and the energy of the crowd. This creates performances that can shift between warm, melodic grooves and a darker, more driving sound while maintaining a clear musical identity.
A
s a producer, he brings that same approach into his own music. African-rooted rhythms meet contemporary electronic influences, with percussion and groove always playing a central role. His productions are made with the dancefloor in mind, while leaving enough space for melody, emotion and his own interpretation of the Afro electronic sound.

Both behind the decks and in the studio, Les Rowness continues to refine his direction without limiting himself to a fixed formula. The result is a sound that feels distinctly his own: rhythmic, energetic and constantly evolving.
